

The NPC = The Andrapoda - Spiritual Satanism and Levels of Humanity

HP Hoodedcobra666

[February 9, 2022](#)

In the Ancient Pythagorean philosophy, there was a name for the people that I have called now NPC's and so on. We used this memetic term for lack of a better term.

People think this might even be insulting, but it truly isn't - in most case it's a description of a condition. Not describing this condition and thinking everyone is the same and equal can jeopardize the journey of a Spiritual Satanist. We need to know what is real.

As the term NPC implies one is a programmed bot without a consciousness [which is unfortunately the case for many people], there is also a similar term that ancient mystics have used a long time before. We have many words for this of course, "sleepers" - the list is big.

However as I discovered there is a far more accurate term that has been used before. It's called an "Andrapod" or in plural "Andrapoda".

This word has to do with the state of a human being when they are on a very low level of consciousness, where they are exceptionally invested only in the most menial tasks and without any regard to spiritual advancement.

Within this word, we have the word of "Andras" which means "Man" as a species, and the "pod" describes a semi state, pointing to something not yet complete or existing in fullness.

For the Pythagoreans, the Andrapod was a state of man that one had to treat with great care. As we are Spiritual Satanists, we must understand the people's condition, even sympathize with them [as it's a pitiful state] but at the same time we are obligated to act with Justice and also if necessary, defend ourselves and protect ourselves from getting assimilated or even worse attacked by the Andrapoda.

There are still people on this planet that would exterminate someone over meditating, studying the wrong path of "spirituality", the list goes. Safety from these people is paramount. It is impossible to live in another way in many places of the world.

The "Andrapod" is not really a human yet, they are a category of beings that try to be more like humans, but they are not there fully yet. Of course, on a species level we are all humans and everything, yet on the internal qualities, these people resemble a lot of animals or even worse beasts. That is not a dignified or a good state.

For this reason, the enemy uses their slander word against all Gentiles as a blanket term, calling them "Goyim" which means "cattle" to insult everyone. They of course also

created the dogma which not only reinforces this reality, but makes most of the people into this level. That from a universal perspective is a crime, but also can destroy and flatten a living lifeform like human beings.

I don't know how to reasonably call some people human while we still behave mostly dominated by SOLELY the lesser aspects of being a human. That is not balanced as one can understand. Balance is necessary. We don't preach forsaking the "lower", we want to befriend and incorporate this in our existence - that is why we are humans.

Yet if this takes 99% of our mind at all times, we cannot be reasonably called "Humans".

The hierarchy of our human species also by Aristotle or the Pythagoreans has been like this, and remains factual to this day:

1. The realized human [we could say, completed human, borderline about to reach on the higher domains].
2. The human. We might say, "average human". Definitely not like an animal, but in many respects needing further rising of the consciousness.
3. The Andrapod or the "Humanoid" in contrast to a human.

The work of the enemy has toppled these categories and reinforced the Andrapod people too much. Our society also never told people in any way how to grow out of this miserable state, which brings misery in one's self and others. The enemy, profiting from this misery, procured the population of this level.

As it should be clear, tyrannies and all sorts of things like this are what many people need to be instated in order to save one's self from the massive blind power of the Andrapods, but the reality is, all we need to do is instate that we rise like human beings - then we would solve most of our problems. With the enemy out of the way, we will have a different world.

We live in a world where the majority is now on the Andrapod level of consciousness, and not on the human level of consciousness which would be the balanced state for us to begin from.

We are also falsely told and enforced to remain in this state, even though it's rather pointless and destructive.

Atrocity, deception, negativity, destruction - these are all very rife in the Andrapoda, not because they are evil beings by definition, but because of poor understanding.

Another negative tendency of them is that like orcs, instead of helping themselves and others grow, they instead do their earnest to shrink other beings and damage them.

While we exist in the same species, the limit of the downfall of consciousness of mankind can be great. We can see this every day. It is the duty of all souls and beings that want to advance to defend themselves and preserve themselves from this.

While people of this state of consciousness might be damaging to us [and even themselves], they can under other conditions be great and they are after all just more beings evolving towards something - failing or succeeding at this path set in front of them.

The enemy has built a system of control and replication of the Andrapoda but also forcibly disallows humans and tries to close all gates so that we remain FORCIBLY into this state. This goes against both the natural flow of existence, but also against the very design of the Gods.

In regards to Races, most people, despite of their differences, they remain Andrapoda. We try to change this, but in many historical intervals, when this happens, the enemy goes at it again to return people to being "Goyim". We are talking about the Gentiles.

To explain for example, now the enemy prepares to control people like monkeys in digitalized "worlds" where are all based on the basic urges of the lowest aspects of the mind and spirit.

Clearly, as Facebook and other things were used to prey on the basic urges of human beings, we now have a repeat of this. Instagram and other things were DESIGNED to prey upon and increase all our "Andrapod" instincts, not the other way.

One can only imagine that the enemy would collapse immediately if we were to embark in the opposite process as a species. They won't last. And they know it too.

In the Middle Ages, they used brutal force. Anything that gives false promises and keeps humans stuck, or promises a fake solution, does not work.

Within all the human races, there are people who are not in this level of being. That level of life is the most populated, and in some races they can have tremendous power, but in all Races they represent [for the time being] a majority.

In Spiritual Satanism we accept and want to form a brotherhood, a place and of learning and support, and maybe even a bastion of change and defense against this as we all know. Satan accepts all people, but they will not tolerate baboons that attack what is holy and sacred.

Lastly, Satan has created the Human species with a quirk. While we have a mass baseline level as Nations, Races, or as a Planet, all human beings are individually free to break off of the "large mass" and advance on their own, accelerating their advancement. This is like taking a straight but narrowly traveled path. I

It's a human right for all humans to be able to take the other path, and even fall if they want. Currently there are many propelling forces to push humanity downwards, without a doubt.

But we want to create a by-road that will allow those who want to go up, to go up. Spiritual Satanists here have made this choice and we want to safeguard this choice because that's the intention of the Gods.

Eventually the end of this is clear, we want to be partakers of the glories and heights of the Gods and receive their spiritual gifts, but also to better our life and reach higher internal levels. With these also arrives external power and improvement in our mortal life.
