

Now, We Must Fight Harder

Post by HP. Hoodedcobra666

[Sun Dec 17, 2017 1:57 am](#)

For those who think this whole deal with the internet is over or whatever, just don't believe this. This is far from over. In fact, this battle has right now only began.

The jews have had a tantrum about how this is a done deal and so forth, because 5 bureaucrats in the FCC (who were never elected or accepted by the people in the first place) have suddenly decided to destroy the internet. Also, 2 of these people did not make this choice, so go figure. This is literally 3 people making this choice. Alas, that is the way history goes.

It is NOW that we must keep up the warfare and keep fighting. I have blocked all messages who have preached 'defeat' and other crap, simply because, this is not a defeat and these messages are inaccurate. I have pointed out in the schedule that we must prioritize the RTR's until the 21st of the month. We have done this RTR intensively, and it will definitely manifest.

The manifestation process may not be without friction or pleasant (thanks jews) but it will definitely happen. We must keep fighting this war that everyone else is busy to cover from, by calling us 'strange', 'bizarre', 'bigots' and the rest of the bullshit the jews have taught them. The fate of this world is by definition relying on the shoulders of the 'strange', the 'bizarre', and even the bigots, such as in the jewish case. As for us here who are a fighting unit organized from all races and people's on earth, all of whom understand their own racial value and racial path and eternal way, there is only one thing to call those who call us 'racist' - Retarded.

And this is not a war the retarded can win, fight, or even understand, so their opinion does not matter.

Satanists and those who have been in actual league with the Devil (Gentiles) have always been the beacon of light for all of humanity, now, in the ancient times, and it shall be so in the future.

Nothing can and will change this.

Let's push onward with our RTR's. The Gods will not let this slide... Those who attack the WWW [666], are in for a very rude awakening.
