

# Internet Warfare - Self Protection Advice and Questions Board

Post by HP. Hoodedcobra666

[Tue May 18, 2021 2:59 pm](#)

In regards to Internet Warfare and Safety, as explained in the other topic which opened the subject, there is going to be more elaboration on how we are going to go about this and therefore the project wasn't yet started.

Not everyone is living under ideal conditions and this should be understood by someone. I.e., if you live in Iran, you might not be able to participate in this for obvious reasons of censorship of the internet. Yet, if someone can already somehow be here [through a VPN or a Tor], they might want to engage, but one has to think it over.

95% of cases should be fine, as those living basically not in Iran, China, Russia and so on or cases such as this. In this case, use logic, and you might not want to engage in anyway, and don't feel bad about it at all; this is for your safety.

Do not feel guilty here, the rest of the family will carry for you here. Just stay focused on the already effective activism and work for Father Satan for your region and in the spiritual warfare.

VPN, Proxy or Tor should suffice in all other cases. When you connect to the Tor, if you live in a censored country, you can use the "Connect Tor With a Bridge" selection when Tor opens up. This should make your connection easier.

One should also consider their case. One shouldn't do this from Iran, better not to. Do you use a shared computer? Then don't do this. Is the only computer you have access to of your parents? You don't do this. Library computer? Neither. There can be a considerable risk involved, while, however small, one could avoid.

It goes beyond saying everyone should be aware of the following:

1. Never use any e-mail that is associated with something else. You need to have a throwaway account. There are many services account that will provide you a free account, such as protonmail or other related services.
2. It's best to have a Proxy, VPN, or Tor [there are free ones, Protonmail does offer a free VPN if you have an account]. Many activists use Protonmail, but be aware that nobody can objectively say what is a best VPN to use. Surfshark and Ghost are to be avoided, as they seem to be from Israel.
3. Also, use an entirely different browser that you don't use for your regular, day to day activities. Mode should be incognito for this.
4. Don't do this is from any computers at school or anything like this.

The download link for the Tor Browser is this:

<https://www.torproject.org/>

The above steps should be enough to safeguard the basic issues, and to avoid mind boggling information. For most cases, and in unless one is living in some extremely negative place, Tor or a Proxy/VPN should suffice.

The platforms of choice also, won't be kikebook or something like this. We are not going to be doing any activism on Facebook or elsewhere, ever.

Some people who have instagram accounts or tiktok accounts where they promote things, are generally people who have understanding of the terrain and do this on individual effort, but we will not officially ever recommend any of this. Everyone's safety should come first.

Those who do this must know well on how, and many have been successful, but we won't go on a group thing over these.

Be aware that any groups that claim to be JoS in places like Facebook, are oftentimes either fanpages or can be made of fakes, or even infiltrators and enemies, and don't represent anything of the JoS officially in anyway.

The platforms of choice will be like minds.com, /pol/, Paranormal, Gab, Youtube comment section [with a fake account], Bitchute and so on, i.e., alternative platforms that are already open to these ideas. On the side, it may be also specific forums or other places recommended by people here who have recommendations and ideas.

Input on the comments appreciated on which platforms people think are most high impact and most important to begin with, feel free to post below.

Also, do ask any questions about this below so others can answer or we can answer, so that this way, there are no remaining questions or worries in regards to how to go about this.
