

The Orwellian Nightmare... The Jew's Wet Dream

High Priest Hooded Cobra 666

[May 18, 2016](#)

Little did Orwell know, that his worst fears and convictions were more of like based on some sort of reality.

A reality that certain beings have been trying to materialize. We reveal these beings and their motivations and this is part of the Truth of Satan, who wants Humanity to rid itself from its chains. Not only that, but they have a plan, which they faithfully follow and a culture of Humanity. And they say this was also inspired by "god". But, what God all in all? Many of these questions will be easily understood by reading the topics below.

I cannot by definition put everything in one post. The contribution is all the writings that have been written. It all forms a larger picture. As about people who are lazy, leave and let be, they don't deserve any Truth anyway.

In order for later posts to not sound bizarre to many people, they ought to check the series of posts. Many posts wouldn't make sense to people who just joined and this certainly makes sense. We, though, have to keep up with revealing information that we are given, even if it's uneasy, or it crosses the certain boundaries people have placed on what they consider "possible" and "true". Satanists must be brave, Satanists must face reality, and it's Satan's Will and intention that Satanists will know the Truth and SEE for themselves.

It would be so great for all of this to not even exist, especially for those who cannot deal with reality and would rather live in a rainbow land. But not only these exist, but they have been shaping history of Humanity until now. People need to wake up. For those brave enough to actually fight and take a stand in changing this, there are solutions and Satan provides these solutions. We have already been impacting the world and many of you have seen it. This doesn't mean nothing for the enemy, and they try to do the exact same, to the last moment. They are certainly pushed back really heavily.

We must NOT let up!

The solution is easy and it's called RTR's, education and spiritual warfare. We are doing very good in enlightening people and we can only do better and better. Satanists must break this train before it goes down the cliff.

"Futuristic" Jewish "Freedom" and Judgment Day, too!

There are also many other writings. Do not forget to salvage Satan's Library as often as possible and get everything therein.
