

# Don't Let Them Criminalize or Guilt Trip Your Defense.

HP Hooded Cobra 666

[January 08, 2018](#)

We are not attacking here. We are defending ourselves. We are not waging wars because we are war mongering or insane, as war is wasting in many ways, and disabling for both parties evolved. But when you are attacked, you have to defend yourself. And the attacks of the enemy have been ongoing for too long.

There are brainwashed retards out there. There are 5 levels of conception. The lowest one is when the person is in illusion, Samsara, and is a devout retard, so hardly stuck in their conditions that they cannot advance. They don't have an open mind to consider what is evident. Real perception is completely closed to them.

There is a deliberate plan to enslave every man, woman and child on the planet, and turn them into cattle. Of course, the higher and the more sci-fi the scenario, the more people cannot "accept" it or stomach it. But if you pay attention, behind booze, behind weed-tard, behind retardation, behind cultural failing, behind bastardization, behind the destruction of lands and continents, always lies the Jew. One just need to do the necessary research. They are not hiding it either.

The Jews have waged war on humanity long ago.

Below I will post something which is a simple conversation going on in Israel. If people don't buy our "propaganda" and pretend to be (((("self-thinking")))), especially where it fits so they can keep their worthless mindset going, maybe they will consider top Rabbis of Israel. Below I am posting an expert of some academic level commentary done by Rabbis.

Below a Rabbi explains how Gentiles are given to Israel as an INHERITANCE. Living cattle that will serve the Jews and be disciplined when they act against them.

Doesn't matter if you accept this future or not, others are forcing on this. If you do not fight them, they will have it. This is called "Zionism" by those in the petty Xian levels of pseudo-awakening, but realistically speaking, just Judaism. Christianity and Islam, both praise Jewish gods with the ultimate objective for this to manifest in society. The end goal of both religions are the decimation of Gentiles and total subjugation to the Jews. Where it has already manifested politically and whatever.

PROSELYTES BELOW MEANS CHRISTIAN/JEW SLAVE. Jews go into your nation to Christianize you, and they have a philosophy that this was (((("Hashem's Plan")))), aka make you a Borg that promotes their agenda and will die later like a pest in the feet of Judea. Those who are "GENTILES", aka, those who are not Christian, are the hated target of the Jews since the beginning, because they have the power to defeat them.

From the writings of Rabbi Dr. Hillel Ben David, "The Four Exiles - Arba Gavulot":

"However, HaShem has big plans for His world. He is going to have the Jews do double duty. In addition to being fixed up for their sin, they will also be role models for the Gentiles. To understand this, we need to understand that Gentiles, not proselytes, are given to Israel as an inheritance:

Tehillim (Psalm) 2:7-9 "I will declare the decree: HaShem hath said unto me, Thou art my Son; this day have I begotten thee. 8 Ask of me, and I shall give thee the heathen 7 for thine inheritance, and the uttermost parts of the earth for thy possession. 9 Thou shalt break them with a rod of iron; thou shalt dash them in pieces like a potter's vessel".

It seems that when we are sent into exile, we provide an example that causes the Gentiles to either become proselytes, or to be condemned. Further, when we went into exile, we did not go alone.

IF YOU QUESTION THE ABOVE IT'S "ANTI-SEMITISM", because nowadays the Jews come and shit straight in your face, and they tell to you, if you oppose their genocidal agenda, and their agenda to usurp everything the world has built, and enslave every person forever, you're a bad and evil Goyim, since they are the moral, the good, and your role-model.

*“So um I smoke weed and still follow the schedule, and I'm not really worried about it, but when we establish Satanic kingdoms and the Jews are destroyed, are you guys gonna cut down all the weed? I'm not gonna freak out I'm just curious. But I am also serious.”*

Why is weed so important to even converse about it? Because many people do it? Maybe if it's worth to keep around it will, but by then, relaxation and other issues won't be dependent on something so trivial.

As for tobacco, this cancerous thing began with the best provisions as well. On how healthy it was and stuff. Because the Jews wanted to invest in it back then, which they did, ultimately sealing the tomb of hundreds of millions of people. Now they want to invest in weed, so weed is the very healthy and nice alternative. Weed is being used by the Jew world order, aside many other things, to instill dependence and docility in the subjects.

It's not up to any "Satanic government" what you're going to do with your brain. Nobody is going to take your right to fry your brain out, if that is what you want. I wonder why people are so overly dignified a plant or something...

## **Reply by High Priestess Shannon:**

These days everyone does it. It is pretty sad that they rely upon it heavily. I know some people who smoke it 2-4 times a day just to feel normal and function, that is their escape, their way to feel whole. These days, there is a whole bunch of crap in it that it is now just as addictive as cocaine or heroin.

I have a loved one who is very much addicted...she dedicated herself years ago but not exactly following the path. Now, it to the point this person cannot concentrate--Its just a dumbing down substance, nothing more.

## **Reply by High Priest Hooded Cobra 666:**

No wonder, it's promoted from all sides. It's not even the best way to relax. People can relax in other ways. But this particular pest is over-represented everywhere, and people buy the propaganda. After a point you need to stone like an idiot just to remain as you said, just functional.

*"I used marijuana in my earlier years. And it had such a profound effect on me compared to others it was insane. I agree it absolutely makes people docile and makes the chakras and aura leak energy. And alters your brain in terrible ways. I went into a state of delusion for a while. seeing creatures and things that were non-existent. All kinds of things, because it screwed up my brain back then. It took me a while to get it back together and come back from the gates of madness..... LOL. But I'm fine now. I know this may sound extreme or just too out there. But I know what I experienced and it was not pretty... And I know what it did for me was absolute torture. Everyone else was fine, but me. Most assume it is a harmless plant. From my experiences. I see it as a weapon. But I'm sure a lot goes under the radar. It can really crack a hole in your subconscious mind and really screw you up."*

Studies show that teenagers using this can lose much IQ from it. These are only the mental backlashes. 120 IQ is very clever, 130 is very very clever. 100 is decent, but 90 is going towards imbecile. So losing points here is not something you want to do is it....

<http://www.mapi.com/blog/the-ayurvedic-view-of-marijuana.html>

An excerpt:

"In Ayurveda, cannabis that is used as a recreational drug is considered toxic to the mind and body. It has been used for thousands of years as a component in various preparations but not as an isolated herb....

Medical Research on Marijuana (Cannabis) Current reviews of the medical research literature suggest that daily consumption of cannabis in teens is associated with depression and anxiety and the development of schizophrenia. Studies indicate that its use can have an irreversible, long-term effect on the brain. Imaging studies show significant changes in brain function and, with continued use, the appearance of functional 'holes' — vast areas of brain matter that are dysfunctional. There is some evidence that regional structural changes are associated with cannabis use patterns, as well as measures of psychopathology. The volume of cortical grey matter is progressively reduced in schizophrenia, with larger grey matter volume decreasing associated with cannabis use. A current neurophysiological model indicates cannabis-induced schizophrenia is a distortion of normal late postnatal brain maturation. Adolescent exposure to cannabis transiently disturbs physiological control of the endogenous cannabinoid system over brain function. As a result, THC (the primary active ingredient in cannabis) may adversely affect adolescent experience-dependent maturation of neural wiring within prefrontal cortical areas. Depending on the amount, time, and duration of

use, this may ultimately lead to the development of psychosis or schizophrenia. Together, these studies highlight the cannabis-related dysfunction of the prefrontal cortex, the central switchboard of executive control and decision-making. Think of the prefrontal cortex as the highest, most powerful value of the intellect. As such and as part of a distributed neural reward system, the prefrontal cortex is responsible for guiding our thinking, emotions and behavior along evolutionary, non-destructive pathways. Drugs can be used, abused or addictive. Abuse is a behavior that continues to occur in the face of obvious negative consequences because one is uneducated or unaware; however, addiction is a brain disease characterized by impaired behavior control that is evident to others while the individual affected becomes increasingly distorted and dysfunctional in their thinking, feelings and behaviors. Gambling may be exciting, but you end up in financial and family ruin most of the time. THC disrupts prefrontal cortical function communication with other brain regions. If the prefrontal cortex goes offline, then our ability to monitor and respond properly to negative outcomes (think of a variety of brain and behavioral problems) is reduced and eventually lost. One is left with the addiction and increasing difficulties in life. Recent research suggests chronic interference with the endocannabinoid system by marijuana use may facilitate drug dependence and impair the body's natural homeostatic balancing mechanisms."

Pretty important reading ^

I personally suspect in adults it shouldn't be any different, especially in meditating and evolving adults.
